Professional Summary

Data Scientist and Data Science graduate student with experience in cloud and data engineering, machine learning, predictive analytics and large-scale data processing using Python, SQL, Scikit-learn, Tableau, Power BI and AWS. Skilled in exploratory data analysis, feature engineering, statistical analysis, model development, data visualization and transforming complex datasets into actionable business insights and operational solutions.

Professional Experience

University of Texas at Arlington

Graduate Research Assistant

Oct 2025 – Present

Arlington, TX

- Analyzed IoT and telemetry datasets using Python to identify trends, anomalies, operational insights and predictive analytics opportunities.
- Developed automated dashboards, ETL workflows and statistical reports supporting data visualization, exploratory analysis and research-driven decision making.

SecureKloud Technology

Associate – Cloud & Data

Oct 2020 – Dec 2022

Chennai, India

- Designed scalable ETL pipelines using Python, SQL, Apache Airflow, Redshift, Lambda and S3 supporting enterprise analytics and reporting systems.
- Performed data extraction, cleansing, transformation, profiling and validation improving reporting accuracy and data consistency across large-scale datasets.
- Built Web-based dashboards and KPI reports supporting business intelligence, operational analytics, trend analysis and executive reporting.
- Optimized SQL queries and cloud workflows reducing reporting latency by 60% and improving pipeline throughput by 30%.
- Implemented serverless workflows using AWS (Lambda, Glue, S3) reducing manual effort and improving scalability.
- Automated deployments using Terraform and CI/CD pipelines in Linux environments reducing deployment time by 50%.

8K Miles Software Services

Cloud Data Intern

Dec 2019 – Sep 2020

Chennai, India

- Developed Python and SQL workflows automating data ingestion, preprocessing, validation, API integration and reporting processes.
- Integrated REST APIs and relational databases streamlining structured and semi-structured data transformation pipelines.

Projects

Customer Churn Prediction & Revenue Impact Model | Python, SQL, XGBoost, Plotly

- Built a churn prediction model on 500K+ customer records using XGBoost and Scikit-learn achieving 91% AUC-ROC through feature engineering, SMOTE balancing and model optimization.
- Performed statistical analysis, hypothesis testing, SHAP explainability and customer segmentation identifying key churn drivers and business risk patterns through interactive Plotly dashboards.

Healthcare Reporting Pipeline | AWS Quicksight, Python, SQL

- Developed ETL workflows integrating healthcare datasets for reporting automation, statistical analysis, trend monitoring and business intelligence reporting.
- Created AWS Quicksight dashboards improving operational visibility, reporting accuracy, stakeholder insights and data-driven decision making.

Course Q&A Agent | Python, RAG, FAISS, LangChain

- Built an AI-driven semantic search platform supporting natural language analytics across 76K+ academic records using vector embeddings and RAG pipelines.
- Implemented machine learning workflows, similarity search and data retrieval pipelines improving response accuracy and analytical insights.

Technical Skills

Programming: Python, SQL, NoSQL

Analytics & Data Science: Exploratory Data Analysis (EDA), Root Cause Analysis (RCA), Machine Learning, Statistical Analysis, Regression, Classification, Clustering, Forecasting, Hypothesis Testing

Visualization: Tableau, Power BI, KPI Dashboards, Reporting Automation, Data Storytelling

Databases: PostgreSQL, MySQL, MongoDB, DynamoDB, Redshift

Cloud & Tools: AWS (S3, Glue, Lambda, Redshift), Git, Airflow, dbt, Jupyter Notebook

Libraries: Pandas, NumPy, Scikit-learn, TensorFlow, XGBoost, FAISS, LangChain

Education

University of Texas at Arlington

Master of Science in Data Science — GPA: 3.7/4.0

Jan 2024 – Dec 2025

Arlington, TX

Velammal Engineering College

Bachelor of Computer Science Engineering

Jul 2016 – Sep 2020

Chennai, India
